New technologies

I am passionate about coding and problem-solving. I have a strong interest in exploring new technologies. I love staying up-to-date with the latest advancements and enjoy the thrill of learning and applying new skills.

WORK EXPERIENCE

Intern Software Developer Since February 2024

[Aikyo](#) Casablanca

Collaborate extensively with the development team to ensure that our web applications surpass user expectations. This hands-on experience has been instrumental in refining my skills in both frontend and backend development, while also offering invaluable exposure to the practical implementation of data analytics.

Intern Web Developer From April 2022 to June 2022

[Youpel](#) Tangier

Created a website for a construction equipment company with two sections: admin and user. Admins can add, edit, and delete equipment listings, and also update contact and about pages. Users can view the equipment and contact the company for product information.

SKILLS

- Strong communication and interpersonal skills for collaboration within the development team.
- Self-motivated and able to work independently.
- Strong problem-solving skills and a passion for coding.

PROJECTS

- **Disaster Aid Application:** a microservices-based web application, connects volunteers and victims effortlessly. Victims can request different types of help, while volunteers can offer assistance quickly, ensuring rapid aid during emergencies.
- **Chat Web Application:** a chat web application for real-time user interactions in chat rooms. It allows users to sign up, log in, create rooms, join rooms, and chat with other users in these rooms.
- **Health Monitoring Application:** A real-time health monitoring application with web and mobile platforms support. It allows users to track and monitor their health data in real-time.
